Question-Answering Communities

Is the Turing Test obsolete?

(KDD 2001 keynote)

TECH SUPPORT AT COMPAQ

“In newsgroups, conversations disappear and you have to ask the same question over and over again. **The thing that makes the real difference is the ability for customers to collaborate and have information be persistent.** That’s how we found QUIQ. It’s exactly the philosophy we’re looking for.”

“**Tech support people can’t keep up with generating content** and are not experts on how to effectively utilize the product ... Mass Collaboration is the next step in Customer Service.”

– Steve Young, VP of Customer Care, Compaq

"I have been doing on-site tech work for the past eight years in the Chicagoland area and hope that I can bring some informative information for those who need it.

I don't claim to have all the answers, as anyone in this field is constantly learning something new on a month to month basis as computers are always changing.

I can tell you this... We as humans build these pesky things... so we can solve the problems of these pesky things, sometimes it just takes time and trial and error."

Understanding Web Content

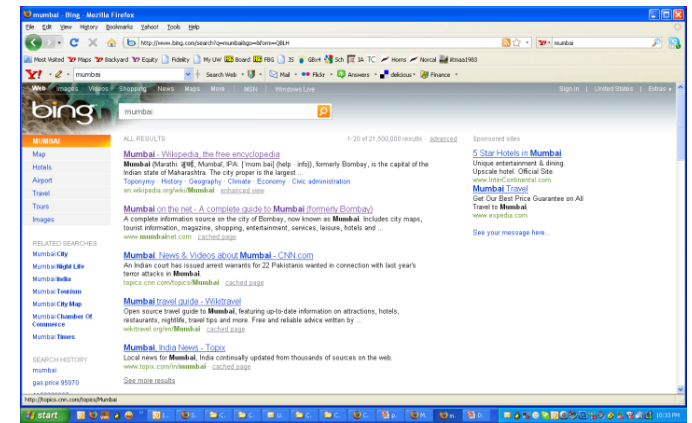

Web of Pages

WEB

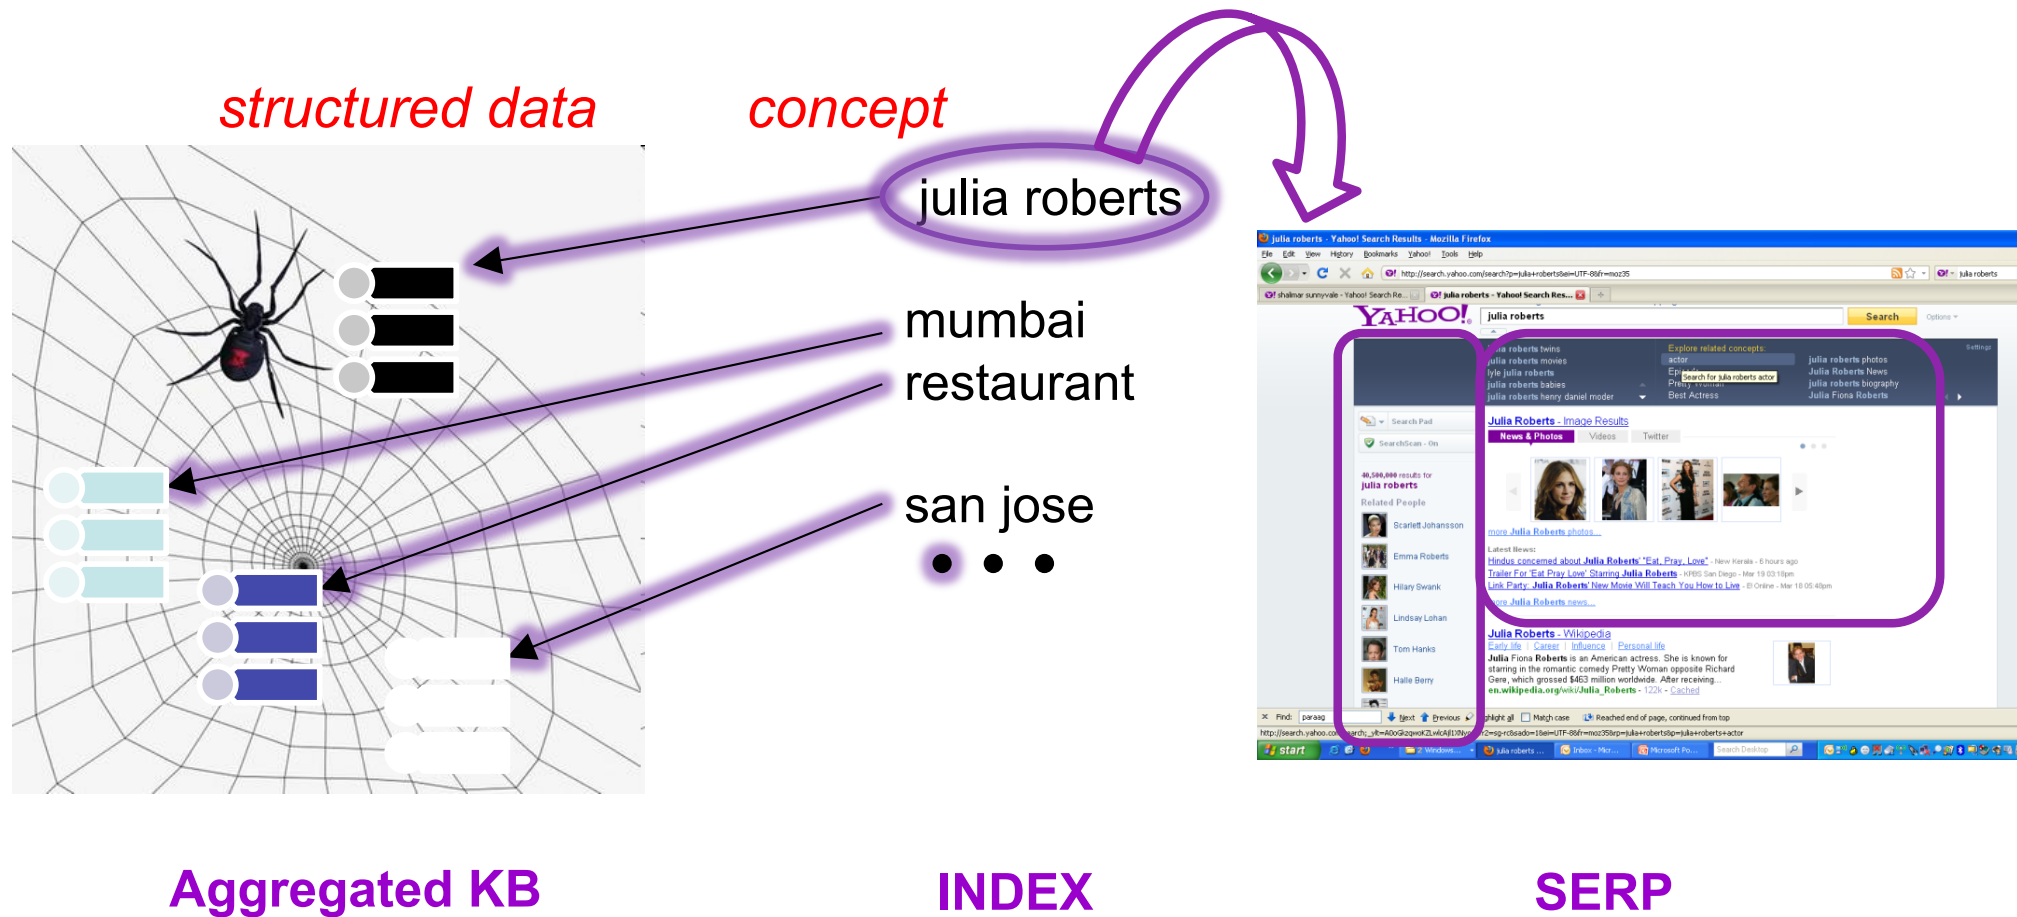

INDEX

SERP

Web of Concepts

The “index” is keyed by concept instance, and organizes all relevant information, wherever it is drawn from, in semantically meaningful ways

ANSWERS, NOT LINKS

Web of Concepts

- The web is a source of information about concepts people care about
- The “index” is keyed by concept instance, and organizes all relevant information, wherever it is drawn from, in semantically meaningful ways
 - E.g., Information about Mumbai, or the Dish-Dash restaurant, is organized in terms of meaningful attributes (population, type of cuisine) and can be retrieved and presented to address whatever the user wants to know about Mumbai or Dish-Dash

Why WoC? How do we get there?

DBLife: Community Information Mgmt

- Integrated information about a (focused) real-world community
- Collaboratively built and maintained by the community
 - Semantic web, “bottom-up”
- Joint work with AnHai Doan, Pedro Domingos, Warren Shen and others at Wisconsin
